

**BOARD OF DIRECTORS OF THE BROAD BEACH
GEOLOGIC HAZARD ABATEMENT DISTRICT**

Adopted this Resolution on June 5, 2022 by the following vote:

RESOLUTION NO. 2022/03

**RESOLUTION AUTHORIZING THE FISCAL YEAR 2022-23 CPI ADJUSTMENT
OF THE ASSESSMENT FOR THE BROAD BEACH GEOLOGIC HAZARD
ABATEMENT DISTRICT**

WHEREAS, the Broad Beach Geologic Hazard Abatement District's ("BBGHAD") 2015 Assessment was adopted on September 6, 2015 and enacted through Resolution No. 2015/05;

WHEREAS, the BBGHAD's 2017 Assessment was adopted on November 12, 2017 pursuant to Resolution No. 2017/09, which authorizes an assessment level commensurate with implementation of the Broad Beach Restoration Project ("Project"), as described in the Engineer's Report dated June 22, 2017 and the Addendum to Engineer's Report dated November 8, 2017.

WHEREAS, Section 8 of Resolution No. 2017/09 also limits the levy on the 2017 Assessment ("2017 Levy Limitation") in the following manner:

"In addition to the amounts currently collected pursuant to the 2015 Assessment for each and every BBGHAD parcel, BBGHAD staff is directed to forebear from collecting all but 10% of the increase between the 2017 Assessment and the 2015 Assessment."

WHEREAS, both the 2015 Assessment and the 2017 Assessment provide that the assessment is subject to annual adjustment reflecting the percentage change in the Los Angeles metropolitan area Consumer Price Index for All Urban Consumers ("CPI Adjustment") over the previous 12 months;

WHEREAS, the BBGHAD uses the Bureau of Labor Statistics' website to determine any annual CPI Adjustment;

WHEREAS, the Bureau of Labor Statistics' website, https://www.bls.gov/regions/west/news-release/consumerpriceindex_losangeles.htm#tableA, establishes the CPI Adjustment between May 31, 2021 and May 31, 2022 and is expected to reflect such information as of approximately June 10, 2022 ("Fiscal Year 2021-22 CPI Adjustment");

WHEREAS, the Board of Directors intends to levy the Fiscal Year 2021-22 CPI Adjustment on the current assessment levy; and

WHEREAS, since the Fiscal Year 2021-22 CPI Adjustment had not yet been published or posted as of the date of the BBGHAD Board of Directors' ("Board") June 5, 2022 meeting, the Board approved at its June 5, 2022 meeting the Fiscal Year 2021-22 CPI Adjustment and directed BBGHAD staff to complete the necessary work, including finalizing this Resolution, once the Bureau of Labor Statistics' website contains the information necessary for the BBGHAD staff to prepare the assessment for each parcel within the District for Fiscal Year 2021-22, as adjusted by the Fiscal Year 2020-21 CPI Adjustment.

WHEREAS, the Bureau of Labor Statistics has now published the Fiscal Year 2021-22 CPI Adjustment and the assessment for each parcel within the District for Fiscal Year 2021-22, as adjusted by the Fiscal Year 2020-21 CPI Adjustment, has been calculated and is specified on the attached Exhibit A, incorporated by this reference.

The BBGHAD BOARD OF DIRECTORS HEREBY RESOLVES THAT:

1. The BBGHAD Assessment for Fiscal Year 2022-23 shall reflect the Fiscal Year 2021-22 CPI Adjustment;
2. Once the BBGHAD staff can obtain from the Bureau of Labor Statistics website (https://www.bls.gov/regions/west/news-release/consumerpriceindex_losangeles.htm#tableA.) the information necessary to determine the Fiscal Year 2021-22 CPI Adjustment for each BBGHAD parcel, BBGHAD staff is directed to apply the Fiscal Year 2021-22 CPI Adjustment to each BBGHAD parcel and prepare the proposed property tax roll (Exhibit "A" to this Resolution) specifying that the assessment for each parcel within the District for Fiscal Year 2022-23 reflects the Fiscal Year 2021-22 CPI Adjustment.
3. BBGHAD staff shall share this Resolution, including the completed Exhibit "A", with the Los Angeles County Auditor-Controller and take any and all other steps necessary to have the adjusted assessment amounts approved here appear on the Fiscal Year 2022-23 tax roll.
4. This Resolution shall become effective immediately upon its passage and adoption.

DATED: June 5, 2022

Norton Karno
NORTON KARNO, Chair

I, Heike Fuchs, Clerk of the Broad Beach Geologic Hazard Abatement District, certify that the foregoing resolution was duly adopted by the Board of Directors of the District at a regular meeting held on the 5th day of June 2022 by the following vote:

AYES: *Kaprio, Kuba, Marice, Antea*

NOES: *N/A*

ABSENT: *Needleman*

ABSTAIN: *N/A*

Consumer Price Index, Los Angeles area — June 2022

Area prices were up 1.1 percent over the past month, up 8.6 percent from a year ago

Prices in the Los Angeles area, as measured by the Consumer Price Index for All Urban Consumers (CPI-U), advanced 1.1 percent in June, the U.S. Bureau of Labor Statistics reported today. (See [table A](#).) Regional Commissioner Chris Rosenlund noted that the June increase was influenced by higher prices for gasoline and new and used motor vehicles. (Data in this report are not seasonally adjusted. Accordingly, month-to-month changes may reflect seasonal influences.)

Over the last 12 months, the CPI-U increased 8.6 percent. (See [chart 1](#) and [table A](#).) Food prices increased 9.3 percent. The index for all items less food and energy advanced 6.0 percent over the year. Energy prices jumped 38.4 percent, largely the result of an increase in the price of gasoline. (See [table 1](#).)

Chart 1. Over-the-year percent change in CPI-U, Los Angeles-Long Beach-Anaheim, CA, June 2019–June 2022

[View Chart Data](#)

Food

Food prices advanced 0.9 percent for the month of June. (See [table 1](#).) Prices for food at home advanced 1.3 percent, led by dairy and related products (3.4 percent) and other food at home (1.4 percent).

Over the year, food prices increased 9.3 percent. Prices for food at home rose 12.2 percent since a year ago, led by other food at home (17.1 percent). Prices for food away from home increased 6.0 percent for the same period.

Energy

The energy index increased 5.2 percent over the month. The increase was mainly due to higher prices for gasoline (6.3 percent). Prices for natural gas service jumped 15.0 percent, but prices for electricity decreased 1.9 percent for the same period.

Energy prices jumped 38.4 percent over the year, largely due to higher prices for gasoline (49.9 percent). Prices paid for natural gas service jumped 38.7 percent, and prices for electricity rose 13.2 percent during the past year.

All items less food and energy

The index for all items less food and energy increased 0.7 percent in June. The index was influenced by price increases for new and used vehicles (4.3 percent) and shelter (0.3 percent).

Over the year, the index for all items less food and energy advanced 6.0 percent. Components contributing to the increase included new and used vehicles (13.3 percent) and shelter (4.4 percent).

The July 2022 Consumer Price Index for the Los Angeles area is scheduled to be released on August 10, 2022.

Technical Note

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 93 percent of the total U.S. population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers approximately 29 percent of the total U.S. population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 75 urban areas across the country from about 6,000 housing units and approximately 22,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date; for most of the CPI-U the reference base is 1982-84 equals 100. An increase of 7 percent from the reference base, for example, is shown as 107.000. Alternatively, that relationship can also be expressed as the price of a base period market basket of goods and services rising from \$100 to \$107. For further details see the CPI home page on the Internet at www.bls.gov/cpi and the CPI section of the BLS Handbook of Methods available on the internet at www.bls.gov/opub/hom/cpi/.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. **NOTE: Area indexes do not measure differences in the level of prices between cities; they only measure the average change in prices for each area since the base period.**

The Los Angeles-Long Beach-Anaheim, CA metropolitan area includes Los Angeles and Orange Counties in California.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Telecommunications Relay Service: 7-1-1.
